Pearl Nickel  
Satin Nickel  
Antique Brass  
White Enamel

## DESCRIPTION:

Our new innovative *E-Z Liner™* is a one piece pre-molded, tileable shower receptor base made of ABS. This receptor was designed and engineered to eliminate Hot Mopping, Hot Tar, Polly Vinyl Sheeting and Lead Formed Membrane Systems. The *E-Z Liner™* is pre-leveled for concrete or wood sub floors and is pre-sloped for drainage into a weep hole drain. The weep hold drain is supplied with each *E-Z Liner™*. The *E-Z Liner™* is ready for the tile installer to apply mortar base and tile. An optional "Screed-Kit" can be purchased and is used when floating mortar on the base and keeping drainage slope accurate. The drain is also adjustable to accommodate various tile and stone thickness variables. A qualified plumber or tile installer can easily put the *E-Z Liner™* in place without using any outside sub-contractors.

***Remember, No Mop, No Glue and No Mess! It's just that E-Z!***
